# WEB DEVELOPMENT

## ❖ Web Designing and Web Programming

Wiantech lives and thrives on web design. If web design is not aesthetically pleasing, users will not come back. If web design is boring, users will not come back. If web design is not functional, users will not come back. If web design is not user friendly, users will not come back. Our websites are not about altering one of the pre-produced mock ups. Wiantech is fresh, hip, and buzzworthy and so are the people we select for our designing team.

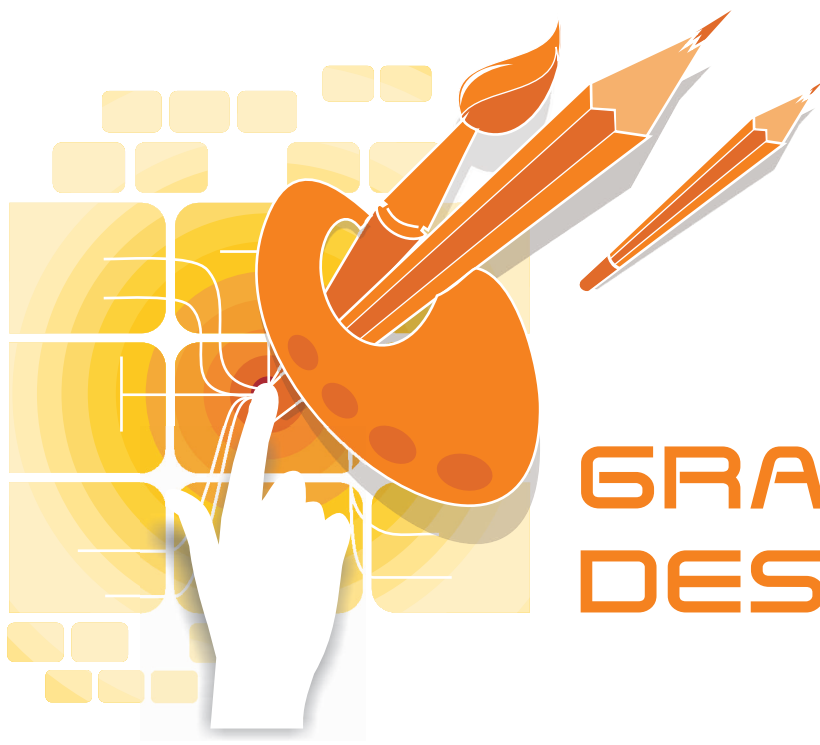

Web Designing and Programming forms the base of Wiantech. That's what Wiantech started its services and excelled with. We understand that every client is different and has his own specific needs.

Wiantech's core specialization areas include PHP, XML and MySQL for web application development, and Flash for presentations and user interfaces. We also provide excellent work in ASP. Wiantech has developed innovative solutions using its core strength - PHP,MySQL and Flash. We have expertise in LAMP.

Wiantech has introduced stringent coding standards and QA process. We have specially made it easy for clients to monitor continuous progress by introducing a bug tracker viz. Mantis. Mantis (i.e., the insect that eats bugs), is the most user friendly bug tracking system. Clients can follow every stage of the bugs being identified to closed.

The Wiantech team assures of a perfect partnership for your business!

# GRAPHIC DESIGNING

## ❖ Graphic Designing

Wiantech has a specialized Creative team. We have a set of graphic designers dedicated to provide you “The Perfect Layout”. We focus on these technologies and arm ourselves with the latest ones.

Our motto is “**Design is Visual Communication**” and our team excels at just proving that, Getting the point across and leaving a lasting impression. Our designers not only excel as creative individuals but more as rounded communicators. Our each piece of work is unique, researched, imagined and delivered. Along with collaborative and interactive experiences, we articulate the inexpressible, imagine the invisible and convey a sense of the aesthetic.

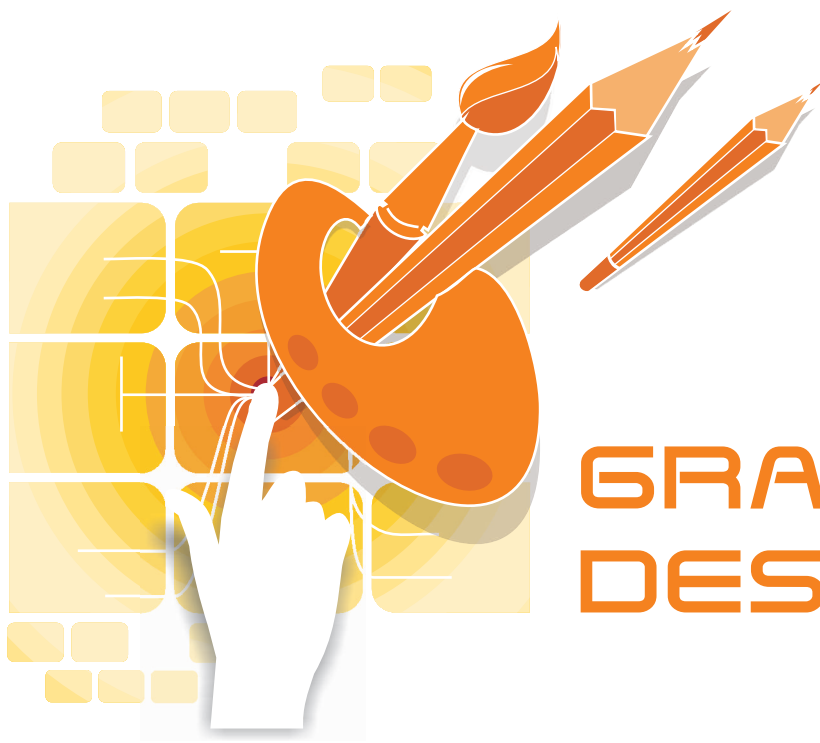

## Corporate Identity

We specialize in creating the most amazing corporate identities. We do a thorough research on your organization, its goal and objectives. This research is then clubbed with latest, creative and original designs and transformed into the Identity package that would be perfect for your organization.

## Logos

A lot of thought and creative sense goes in every logo. Every logo should have a history or a story behind it. Every aspect of the logo is not just abstract art but symbolizes a particular aspect of why it was created. A logo should be something that should be good enough to immediately bring forth the entire picture of your organization. This is what we invest in a logo and this is what we provide you.

## ❖ Graphic Designing

### Magazine/Book Covers

Statistics shows that an average commuter picks up a magazine based on the picture and headlines on the cover page. There are several magazines in the market on any given subject; the one that attracts the consumer to yours is what increases your revenues. We assist you in achieving that goal.

Book covers give you one bold impression. It could represent a series of books that you have. In that case, an identity is to be maintained. A particular pattern represents that author. In individual cases, book covers need to represent in an artistic form that gist of the book and the aim of where it gets to. These are the principles we like to follow.

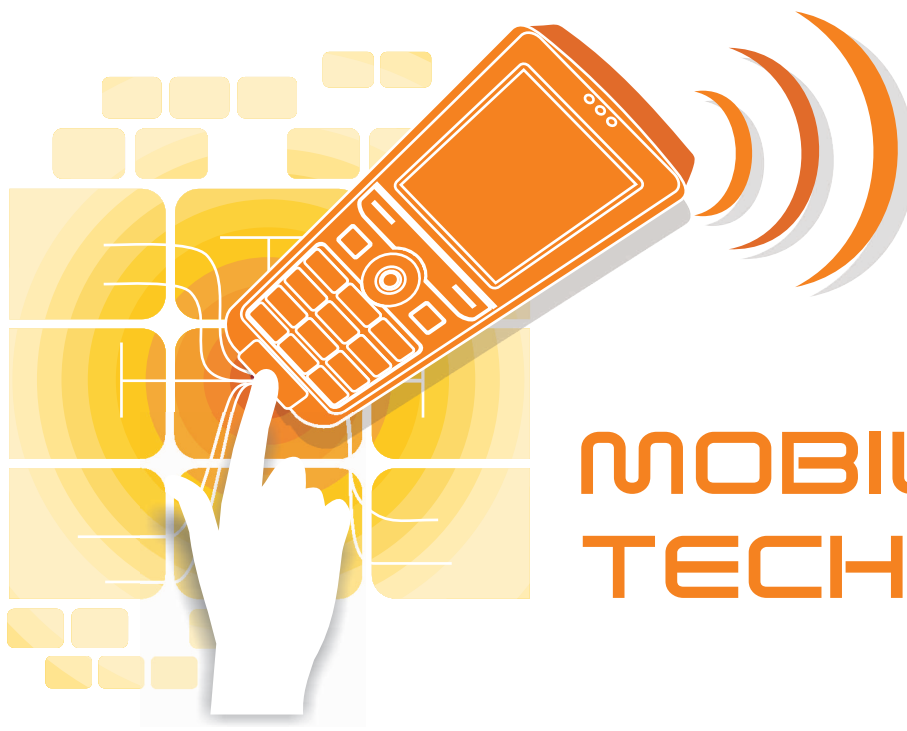

### Brochures

Brochures are a quick summary of what you want to communicate. An attractive packaging with perfect placing of every component in the brochure is what we create, be it print or electronic media.

### Banner Ads

In the infinite world of the internet, marketing yourself is of prime most importance. Survival of the fittest depends on that. Your banner ad is the one that is going to divert traffic to you. Each banner ad has about 2-8 sec to attract a consumer. In this time, we need to convert them.

# MOBILE TECHNOLOGIES

## ❖ Mobile Technologies

The future is wireless. The abundance of possibilities in the wireless world is far more than a human mind can imagine. The improvement in wireless technology has made it far superior to the results obtained from the wired technology.

Mobile phones, Palm and Pocket PC is still an emerging market which has tremendous potential. Mobile computing is vibrant and diverse. It has a void to be filled in with innovative products. A host of applications are available for these devices and still, a lot is required.

Some of the areas we cover include - SMS and MMS services, WAP, WAP Push, VoIP, IVR (Interactive Voice Response) service, Bluetooth, Symbian, Pocket PC, Linux and Flash Lite. To cater to the mobile world, we can also provide solutions for gaming, wallpapers and screen savers. We can also provide digital content for certain movies.

Wiantech can assist you in creating custom solutions for the mobile platform. Solutions that shall perfectly match your needs.

# I.T. - HUMAN RESOURCE

## ❖ IT Recruitments

Wiantech enables enterprises to reduce manpower acquisition and recurring costs while at the same time increasing the value of its deliverables with respect to price and performance.

### Outsourcing :

Wiantech offers services with unprecedented efficiency in its sourcing process making it worthwhile for even the smallest of the tasks to be outsourced and the requirements to be satisfied. This recruitment of talented individuals from India has proven to have amazing cost benefit analysis to organizations worldwide.

### Staff augmentation :

Rapidly changing technology and the imbalance between available and required skills necessitate this service. Wiantech offers a "right to hire" option that enables the client to retain good talent.

### Consulting :

Wiantech has a long experience in providing talented consultants and adhering to international quality standards.

**Recruitment :** Most IT organizations spend a large amount of money on advertising on skilled resources. The cost of scrutiny of the resulting responses is very high and only a few resumes meet the basic requirements.

# I.T. - HUMAN RESOURCE

## ❖ IT Recruitments

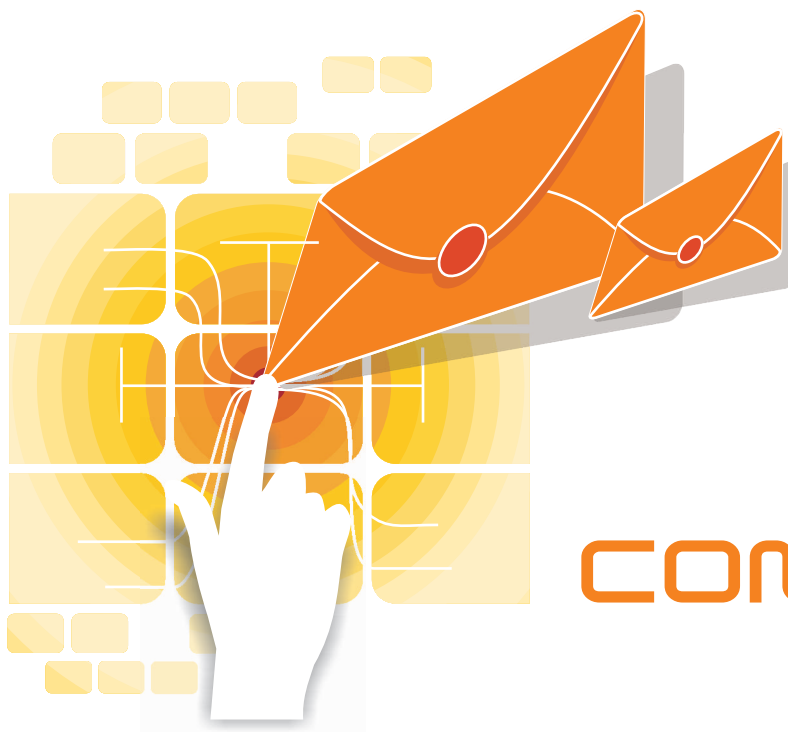

With high overheads, time pressure and multiple tasks at hand, HR personnel have difficulty in screening all resumes leading to inadequate staffing. We offer resume scrutiny and resume database services that help alleviate recruitment challenges.

**Recruitment process :** Wiantech follows the following recruitment process :

1. Read and enter the resume data into the database to include the name, address, qualification, experience, major skills and minor skills, employment history and academic records. This information is collected through the resume and phone interviews with the candidate.
2. Sort the resumes based on the skills, experience, or any given criteria. Match with the given openings and shortlist for further interviews.
3. Interview the candidates and tabulate the personality profiles, verify the academic, employment and salary records.
4. Technical evaluation.
